## 2. SUB-PROGRAMME OVERVIEW

The Strategic Intervention sub- programme was established to implement strategic initiatives to advance industrial development. The strategic focus of this sub-programme is to increase manufacturing capabilities of the province and to support our industries to remain globally competitive and sustainable. Its purpose is to provide and facilitate the development of strategic industrial interventions and catalytic infrastructure with particular focus on the following:

- Industrial Economic Hubs and
- Special Economic Zones.

Including the following industrial sectors – Green & Renewable Energy; Automotive, Tooling and Foundry; Chemicals and Mineral Beneficiation, Clothing & Textile, Footwear and Leather, ICT and digitization.

### 2.1 PROJECT SPECIFIC BACKGROUND

In 2010 the KwaZulu-Natal Department of Economic Development, Tourism and Environmental Affairs (EDTEA) identified the need to transform the province's economy to a green economy, in line with national policy. EDTEA therefore initiated a project in the second half of 2010 to better understand and promote the green economy in KwaZulu-Natal (KZN). The first phase of the Green Economy Project (Unlocking the KwaZulu-Natal Green Economy) was completed in February 2011 with the production of a literature review to define the green economy, and a sector analysis of green economy activities in KZN Province, which identified priority areas and interventions for greening the provincial economy.

Sector and multi-stakeholder workshops were conducted to augment the sector analysis, and to initiate a collaborative process with key stakeholders to stimulate and unlock the green economy. By harnessing interest around the green economy, this interactive process resulted in the beginning of a green economy 'community of innovation', or green economy hub. Most of the stakeholders interviewed and those involved in the workshops indicated that they would like to develop partnerships with government to drive the green economy initiative forward.

EDTEA (Department of Economic Development, Tourism and Environmental Affairs) further initiated the KZN Green Economy rooftop PV study, the aims of which were to promote the use of, and improve the uptake of renewable energy in KZN. Buildings used in the study were government owned buildings, with an emphasis on fostering public awareness of renewable energy. As part of this study, CRSES (Centre for Renewable and Sustainable Energy Studies), Stellenbosch University, in partnership with the EDTEA, approached various organisations within KZN to discuss potential sites for installing rooftop PV (Photovoltaic) systems. CRSES subsequently conducted prefeasibility studies on six (6) selected client sites, detailing recommended PV-System specifications and financial payback scenarios.

The identified buildings identified were:

1. KZN Ezemvelo Wildlife Rooftop - Msunduzi Municipality, Pietermaritzburg
2. Office of the Premier – Natalia - Msunduzi Municipality, Pietermaritzburg
3. Office of the Premier - M Mabhida - Msunduzi Municipality, Pietermaritzburg
4. Grey's Hospital Rooftop - Msunduzi Municipality, Pietermaritzburg
5. Vryheid Hospital Rooftop - Abaqulusi Municipality, Vryheid.
6. Department of COGTA - eThekweni Municipality, Durban

The study to be implemented consists of the following:

- a) Installation of PV systems suggested by the CRSES pre-feasibility studies, at the above three preselected client locations.

## Q 10 EDTEA 23-24

- b) Monitoring and ongoing performance evaluation of these six installations for a period of three (3) years.
- c) Applying the findings and experience gained from stage one to identify further pilot sites for PV-rooftop installations
- b) Auditing, design, procurement, installation, monitoring and evaluation of these further pilot PV installations, as per refined system criteria agreed upon with clients.

Sites 4, 5 & 6 were successfully completed and based upon the results of these pilot projects, the Premier of KwaZulu-Natal has given an instruction that the project be continued for sites 1,2 & 3.

### 3. PURPOSE OF THE TOR

The purpose of this document is to solicit the services of a Solar Panel installation providers who could assist KZN EDTEA and beneficiaries in implementing the project. The TOR specifies the requirements of KZN EDTEA to be responded to by potential bidders. Potential bidders can include a firm or consortium of firms or a consortium of individual experts.

The Department is looking for service providers who can effectively demonstrate how they will deliver these objectives, whilst providing value for money. It is therefore important that prospective bidders, clearly and concisely describe their plans for each of the specific outcomes, timeframes, resource allocations, deliverables, and risk management strategies.

The Service Providers will have to provide the following services for the project:

- Design, supply, deliver, install, maintain and commission the required 34.7 KWp grid tied solar photovoltaic panels at Natalia building Rooftop.

### 4. PROJECT OBJECTIVES

#### 4.1 WHY THE PROJECT IS IMPORTANT

##### A Rising Challenge

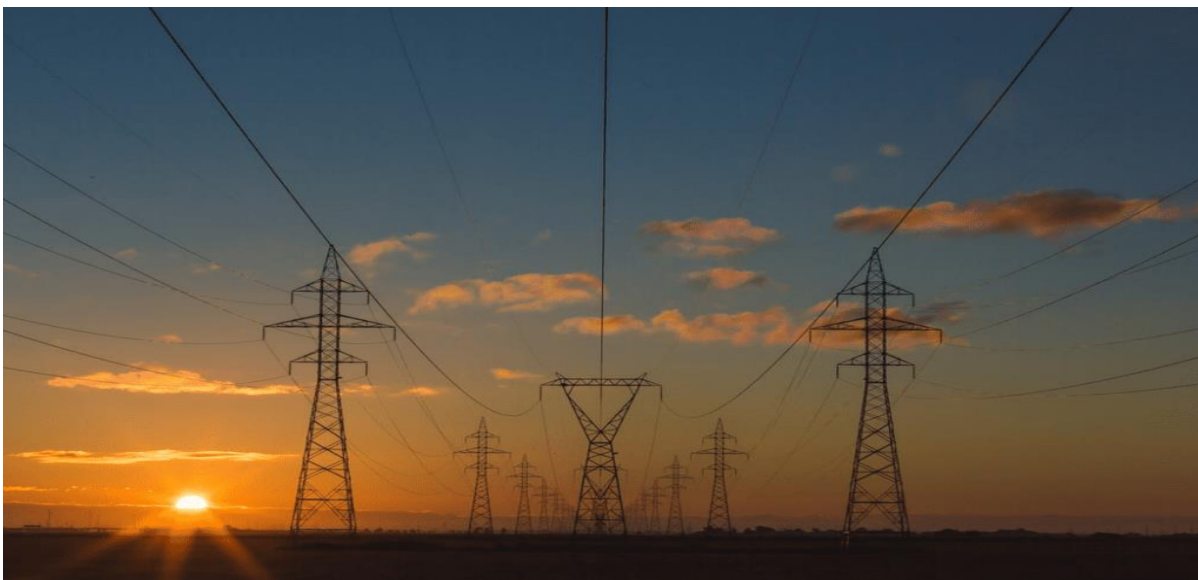

Electricity prices in South Africa are continuing to hike increasingly leading to the commodity becoming unaffordable to most South Africans. Moreover, Eskom, the country's giant electricity producer and electricity supplier is entangled in debts of more than R420 billion and this only confirms the tough journey ahead as the company resorts to increasing prices to manage its debt.

##### The Crisis In South-Africa's Electricity Sector

Recent developments in South Africa's energy sector has seen the National Energy Regulator of South Africa (Nersa) approve an additional electricity bill price increase of up-to 18% to both municipalities and Eskom subscribers – the largest electricity producer in South Africa that accounts for up to 95% of the country's total power generated. As power users express their concerns on the rising power tariffs, these costs could be already breaking the bank among many consumers.

##### Eskom, The Country's Giant Energy Company Seeking To Increase Electricity Prices

Eskom has already written to Nersa requesting for room to increase its electricity prices to overshadow the issues of load shedding. If this goes through, then, the consumer should prepare for a 18% price increases and a 50% tariff upsurge in the next couple of years.

Electricity Power Lines

## Electricity Bills Could Double, Experts Warn

Ted Blom, an energy expert, has warned on the prospective 45% increase on current electricity energy tariff with high chances of electricity bills doubling in two years' time.

This far, the hard nut to crack is finding the best alternative energy solutions and initiating appropriate measures to lower energy consumption.

## South Africans Turning To Green Energy

As South Africans turn to solar energy especially **Solar Photovoltaic** as an alternative energy source for relief from the hefty electricity costs, it could also be the best time for you to consider the green energy.

## The Rising Popularity Of Solar Energy In South Africa

South African President, Cyril Ramaphosa is also supporting the idea of households and companies generating their own energy and this could solidify the narrative of going for solar energy.

## Solar Energy Becoming Popular in South Africa

Going for green energy proves to be one of the most efficient means to combat the life-threatening climate change crisis. It is one of the strategies that South Africans are affecting to address climate change.

### 1. The Cost of Implementing Solar Energy Is Manageable

The World Economic Forum (WEF) classifies setting up solar systems as cost-effective compared to cost of installing standard electricity and most other alternative energy sources like fossil fuels and natural gas.

### 2. Solar Is A Reliable Off-Grid Power Solution

Solar power banks with portable solar chargers have become a reliable power solution for people in areas lacking regular power grids. Innovations are bringing on board solar powered generators friendly to the environment without carbon dioxide emissions. The benefits of solar are endless, the cost of solar installation affordable, and you have a pool of solar installers to have the job done.

### 3. Solar Energy Supports Recycling

As solar panels come out of service, recycling plants can extract useful minerals like polymers, copper, silicon and parts like glass and aluminum that could be used for another purpose or even in the manufacture of refurbished or new solar panels.

### 4. Powering Renewable Energy

No matter their abundance, pollutant fossil fuels are exhaustible – once extracted and used, that means no more power. Solar energy is the saviour of the limited exhaustible energy sources. Nuclear engineers estimate that harnessing solar energy from 1% of the Sahara Desert could power the entire world.

### 5. Green Energy is Climate Friendly

Unlike the fossil fuels that emit carbon dioxide in generating regular electricity ending up polluting the environment, solar energy does not produce

**Q 10 EDTEA 23-24**

environment contaminants. They are a clean and sustainable energy source producing electricity at molecular levels without carbon combustion.

**4.2 OVERALL OBJECTIVE**

The overall objective of the project is to assist government to turn the energy source for its buildings to solar energy especially Solar Photovoltaic as an alternative energy source for relief from the hefty electricity costs, and also assist in the implementation of green energy to curb greenhouse gas emissions.

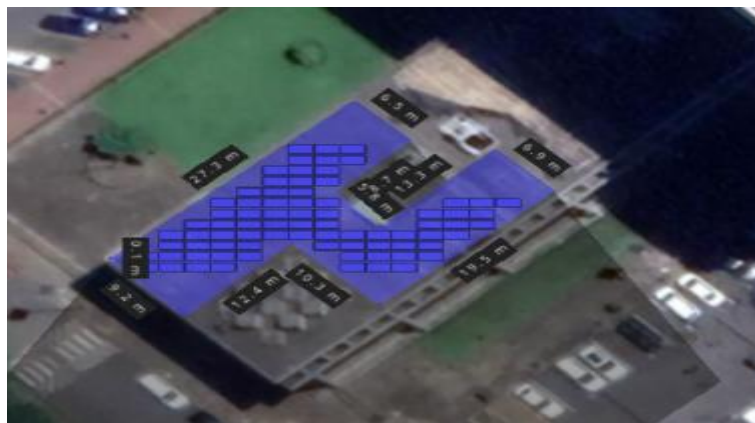

**4.3 SPECIFIC OBJECTIVE**

The specific objective of the project is to source a service provider for the provision design, installation, monitoring and commissioning of grid tied 34.7 KWp Solar PV Panels at the Natalia Building Rooftop in Pietermaritzburg
