#### 2. Departmental and Programme Overview

- 2.1 The Republic of South Africa is still suffering from the triple challenges of poverty, unemployment and inequality, hence current policies and provincial strategies should be aimed at addressing these issues. Among other objectives, the provincial strategies are currently centred on job creation; rural economic development; skills development; economic transformation and black industrialization. The KwaZulu-Natal Department of Economic Development, Tourism and Environmental Affairs (EDTEA) is mandated to oversee the socio-economic transformation in the province which means it has responsibility to implement programmes responding to the above-mentioned strategies. Furthermore, EDTEA has a mandate to oversee environmental management of natural resources within the KZN province.
- 2.2 The Department (EDTEA) as one of its response to job creation, skills development and environmental management, has created an Expanded Public Works Programme known as Invasive Alien Species Programme, a programme established to deal with the management and control of invasive alien plants within the KZN Province. The main objectives of the IAS programme is to control and manage the spread of invasive alien species within areas of geographical significance and create awareness of its negative impacts. The programme is implemented in a manner that creates more than 8000 short-term jobs per annum and provides training opportunities for the participants. The Programme is constituted within government's National Expanded Public Works Programme (EPWP) framework, hence it is labour intensive. Some of the required tools and equipment are to be provided to project workers that would be involved within the IAS programme.

2.3 Furthermore, this financial year (2023/24), as response to job creation, skills development and environmental management, the Department (EDTEA) has created an Expanded Public Works Programme to assist local municipalities in the collection and disposal of waste within identified waste hot-spot areas. It is envisaged the Waste programme will result in the creation of more than 6000 job opportunities per annum and will also result in provision of training for the participants. Hence, some of the required tools and equipment are to be provided to project workers that would be involved within the Waste programme.

### **3. Purpose of the TOR**

The purpose of the Terms of Reference is to solicit service providers to form a panel of approved service providers that will supply and deliver tools and equipment for a period of 03 years.

### **4. Project Objectives**

The main objective of the Terms of Reference is to have reputable and experienced service providers placed on a panel invited for the procurement of tools and equipment required for various Departmental offices.

In order to operate efficiently and effectively and meet service delivery, the establishment of panel of approved service providers for the procurement of tools and equipment is to expedite the procurement process for the selection of service providers to supply the required goods to the Department.

The existence of a panel of approved service providers for the Department will reduce the time period within which the services can be procured as quotations can be invited from the approved service providers via the quotation system. Service providers on the panel will be requested to provide quotations for the specific goods required at that particular time. Once in a panel, service providers will be evaluated on price and preference points only.

#### **4.1. Key Output**

The service provider will have to supply required tools and equipment according to the specification outlined in the RFQ and to be delivered in the respective delivery address specified.

### **5. Scope of Work and Specification**

As part of the scope of work and specification, the following needs to be noted;

- 5.1. Tools and equipment are to be utilize by project workers that would be involved with project activities of both alien plant control clearing and waste collection to ensure work effectiveness and efficiency.
- 5.2. Service providers on the panel will be requested to quote for the tools and equipment required. Bidders must be able to supply and deliver tools and equipment that will be stipulated in the RFQ.
- 5.3. Required items will be supported by a detailed specification with relevant sizes and the quantity required for each. Service providers are to ensure that the required sizes and quantities are delivered. Service providers will be required to provide tools and equipment of high-quality standards as per the specifications.
- 5.4. The Department of Transport tariffs for the use of motor transport are to be utilized for the reimbursement in respect of delivering goods required.

## 5.5. Specific Deliverables
