4. Project Objectives

South Africa has an objective to diversify energy mix, which is currently dominated by coal and (predominantly) imported transport fuels. The KZN Province is expected to contribute to the low carbon economy as committed by the country through the Nationally Determined Contributions (NDCs) under the United Nations Framework Convention on Climate Change (UNFCCC). Energy is one of the key drivers of our economy as well as basic livelihoods and the provincial GHG inventory has identified energy as a leading sector where fuel combustion contributes more to the province's GHG emission profile.

South Africa ratified the United Nations Framework Convention on Climate Change (UNFCCC) in August 1997. Article 4.5 of UNFCCC identifies technology transfer as a key mechanism for addressing climate change and requires developed countries to support technology development and utilization in the developing countries. In order to operationalize Article 4.5, parties agreed to introduce a mechanism known as Technological Need Assessment (TNA), which is housed within the United Nation Environmental Programme (UNEP), under the Climate Technological Centre and Network (CTCN) programme.

In 2014 the iLembe District held its second District Climate Change Conference, which recommended the move towards a low carbon society. One of the resolutions of the 2014 Climate Change Summit was to consider undertaking the TNA in order to understand technologies that are already within the District and also to prioritise technologies required to move the region towards a low carbon society.

The TNA Report, undertaken in 2016, has prioritised the Renewable energy: Solar PV as one of the most critical Technology to form part of the mitigation programme. Therefore, as part of the move towards the low carbon economy, the Municipality wishes to install the PV Technology within the Maphumulo Municipal Office Building along the Maphumulo Long Road within Maphumulo Local Municipality, iLembe District, in KwaZulu Natal Province.

The national government of our country generally focuses on large scale PV technology implementation. However, there is a growing need for localized initiatives and as a result municipal based project proposal has already been prepared for sourcing funding. This is also largely informed by the local mitigation potential analysis, which has indicated that for the years 2030 and 2050 there is a potential to achieve 20,977 and 54, 227 ktCO₂e GHG emissions reductions respectively at a local level, thus rendering it attractive for climate change mitigation.

The iLembe District Municipality lies on the east coast of KwaZulu-Natal, between eThekweni Metro in the South and King Cetshwayo District in the North. To the west, iLembe is bordered by two Districts; uMgungundlovu and uMzinyathi. At 3 260km², this is the smallest of the 10 KZN District Municipalities with a total population of approximately 700 000 inhabitants. The iLembe District is constituted of four Local Municipalities; Mandeni, KwaDukuza, Ndwedwe and Maphumulo. The project will be located within the Maphumulo Local Municipality.

4.1 Overall Objectives

The specific objectives of the project are:

- To install the Solar PV System technology in the Maphumulo Municipal Offices with the following specifications:
 - 30 KWp Solar Photovoltaic System
 - 30KW inverter
 - 550W solar panels
- To reduce the reliance of Maphumulo Municipality on the National Grid for office lighting.
- To promote a lifestyle that encourages the low economy society within the Maphumulo Local Municipality specifically and the iLembe District in general.
- To grow the Green Economy Sector, especially in the Solar PV market within the iLembe District, and the KwaZulu Natal Province in general.

4.2. Key Outputs

The key Outputs envisaged for the proposed project are:

- Assessment of the building to determine the positioning of the panels and the wiring
- Analysis of the recent electricity consumption trends (including occupants' behavior) of the building for the past 12 months;
- Stakeholder Engagement on the following issues:
 - Choice of panel model and installation
 - Allocation of the Budget for the project
 - Facility Design (panels), required permits and grants from relevant authorities.
 - Site inspection and familiarization
- Project Implementation which will entail:
 - Discussion on the suitable position
 - Installation of panels and
 - Connection of the converter/batteries.
- Development of the operational and maintenance manual or guide
- Capacity building (training) of the stakeholders on the operation and monitoring of the solar system
- Preparation of the project Closeout Report

All these outputs are discussed in details below.

OUTPUT 1: Undertake an assessment of the building

The appointed services provider will firstly undertake a building assessment, to assist the Municipality in determining the relevance of the project need and desirability as well as consider issues of compliance, financial, timing and others. The undertaking of building assessment will assist to:

- a) Define the objective and scope of the project.
- b) Clearly define the project benefits.
- c) Analyze technical feasibility and compliance (relevant policy requirement) of the project.
- d) Assess resource (finance, human etc.) allocation per project activity.
- e) Evaluate potential risks, associated with the undertaking of the project.
- f) Set project time frame towards the implementation process.

OUTPUT 2: Conduct a trend analysis of recent electricity consumption in building

The services provider will have to assess energy usage within the building for a period of past 12 months. This data is critical in understanding the impact of the proposed project. The Municipality will provide such information.

OUTPUT 3: Stakeholder engagement

To ensure the buy in from the key parties, identification of critical stakeholders is crucial and engagement thereof. For the success of this project the following stakeholders will be considered, that is:

- a) Meetings with and presentations to officials from iLembe District and Maphumulo Local Municipality, and EDTEA.
- b) Discussions with officials from the Department of Energy, the Renewable Energy Section.
- c) Meetings with Maphumulo Municipality Management

OUTPUT 4: Project implementation

Service provider to undertake technical work for project implementation. The technical details to be included are:

- a) Selection of the position for the installation of the Solar PV Panels, to be guided by the building assessment report. The Panels should be positioned such that they are exposed to constant supply of sunrays.
- b) Installation of the Solar PV panels onto the rooftop of the Municipal buildings and connection of the inverter.
- c) Testing after installation.

NB: Utilization of local youth possessing skills (e.g. construction and plumbing) from vocational training should be considered where semi-skilled workers are required. In the absence of such skill sets, community members, especially youth, should be upskilled so that they are able to maintain and deal with the faults that may arise during the project's operational phase. This will help with the development of skills locally and also create jobs.

OUTPUT 5: Preparation of Operational and Maintenance Manual

The Operational guiding manuals / procedures will have to be developed for the operation and maintenance of the installed solar PV technologies. This Operational guiding manual should include how the technology is used and maintained, and as such it should be simple, user-friendly and easy to follow.

OUTPUT 6: Preparation of the Closeout Report and presentation

Convene a workshop to hand over the project close-out report to the client together with the completed deliverables, including training certificates to three youth trainees. The report must have details of all operations, maintenance and ongoing support, together with advice on any outstanding actions/issues and ongoing risks. The service provider will be expected to conduct a training session on the manual during this workshop and produce evidence in the form of training registers and certificates of attendance.
